

Ryno Lacer®

wrist & thumb support

The Ryno Lacer provides superior immobilization of the CMC and MP joints of the thumb, yet it permits limited motion of the IP joint to allow for contact with the opposing fingers. The Ryno Lacer offers your patients the support they need and the comfort they demand.

Lace closure design

Allows for easy application

Radial, palmar and dorsal stays

Restrain wrist and thumb motion. Aluminum stays may be bent to the desired degree of flexion or extension of the wrist and abduction or adduction of the thumb.

Polypropylene liner and perforated suede

Allow moisture to evaporate away from the skin.

Comfort and compliance

The anatomically contoured design and the adjustable thumb strap provide a comfortable fit and allow unrestricted motion of the fingers.

Indications:

- DeQuervain's Tendonitis
- Gamekeeper's Thumb
- Post Cast Healing
- Selected Scaphoid Injuries

Suggested HCPCS: L3807
