

Gripper™ ROM Hinged Knee Brace

The *Gripper™* Range-of-Motion Hinged Knee Brace provides your patients with the stability and versatility they need while resisting distal migration.

16" Gripper ROM

Control & Adjustability

Easy access polycentric Range-of-Motion hinges allows for quick positioning of flexion and extension stops at 0°, 15°, 30°, 60°, and 90°. ROM hinges have an additional padded cover to allow for athletic participation. Inelastic nylon straps work in concert with ROM hinges to control flexion and extension and provide medial and lateral stability.

Compliance & Migration

Internal SkinLoc™ pad works in concert with the outer closure strap to grip the proximal end of the calf muscle and inhibit the brace from migrating distally, thereby greatly enhancing patient compliance.

Durability & Comfort

ROM hinge pockets are reinforced on the inside with ballistic nylon material at wear points to prevent hinges from wearing through the pocket. Unique condylar pad design enhances comfort. Wraparound anterior closure allows for ease of application and an optimum fit.

Indications:

- Meniscal injuries
- MCL or LCL injuries or sprains
- Medial or lateral knee instabilities

12" Gripper ROM

The Gripper ROM Hinge is available in two different base materials: Neoprene and CoolFlex™. The neoprene version provides warmth and superior compression. The CoolFlex version is breathable and hypoallergenic. All versions of the Gripper are latex free.

16" Neoprene	16" CoolFlex	12" Neoprene	12" CoolFlex	Size	6" Above	Mid-Patella	6" Below
