ASO® Flex-Hinge™
Ankle Stabilizer

The fusion of a hinged and lace-up ankle stabilizer

The ASO Flex-Hinge combines the proven technology of the ASO's strapping system with a built-in articulated plastic shell for superior ankle stabilization.

actual product

Internal Plastic Hinge
The plastic hinge material contours to the anatomy and has excellent durability. The Flex-Hinge's unique design works synergistically with the stabilizing straps to resist eversion and inversion of the ankle while also applying circumferential compression around the distal tibiofibular joint.

Stabilizing Straps
The stabilizing straps are now angled to better contour above the malleoli for enhanced comfort and control. Nylon stabilizing straps form a complete figure-eight to help stabilize the subtalar and talocrural joints.

Internal plastic shell is superimposed in the above photo for illustrative purposes

CoolFlex Achilles Pad & Tongue
CoolFlex™ padding has been increased on the inside of the boot along the Achilles tendon to provide greater comfort. The shoe lace is attached to the tongue to ensure lace is always centered.

Invisible Seam
For improved comfort, the seam is now positioned along the rear portion of the boot. There is no longer a seam under the foot.

Indications:
- Inversion or eversion ankle sprains
- Syndesmotic ankle sprains (high ankle sprains)
- Medial or lateral ankle instability
- Subtalar joint instability

Men's Shoe Size	6-7	7 1/2-9	9 1/2-11	11 1/2-13	13 1/2-15
Narrow Foot		xs	s	m	l
