

Gripper™

Hinged Knee Brace 12"

The Gripper™ Hinged Knee Brace provides your athletes and patients with the medial and lateral stability they need while resisting distal migration.

Compliance & Migration

Internal SkinLoc™ pad works in concert with the outer closure strap to grip the proximal end of the calf muscle and inhibit the brace from migrating distally, thereby enhancing patient compliance

Durability

Straps are made of high tension elastic that allows for numerous applications without fraying or losing closure strength. Metal hinge pockets are reinforced on the inside with ballistic nylon material at wear points to prevent hinge from wearing through the pocket.

Ease of Application & Comfort

The wraparound anterior closure allows for ease of application and an optimum fit. Open popliteal minimizes material bunching during flexion to improve comfort.

The Gripper 12" is available in two different base materials: Neoprene and CoolFlex™. The neoprene version provides warmth and superior compression. The Gripper 2 is made with a thinner and lighter neoprene. The CoolFlex version is breathable and hypoallergenic.

Gripper Neoprene 3/16"	Gripper CoolFlex	Gripper 2 Neoprene 1/8"	Size	6" Above	Mid-Patella	6" Below
